

Labdhi Doshi

Service Designer | Experience Designer

Human-Centred Service and Experience designer translating research and insight into structured interventions across public transit systems, social impact, and physical brand experience. Comfortable owning a project end-to-end, from stakeholder research through delivery, including co-founding a studio built to do this work sustainably outside the grant economy.

WORK

Researcher & Strategy Consultant / Independent Designer / August 2024 – Present

Conducting qualitative research and strategy for social impact projects, including community engagement, stakeholder interviews, and research synthesis. Designing and facilitating workshops for nonprofits to understand stakeholder perspectives. Creating innovation and strategy roadmaps, translating insights into strategies.

Senior Service Designer / Tata Elxsi / Jul 2022 – Apr 2024 / Pune, India

Led **end-to-end service design, from strategy to implementation, for media systems across three concurrent international airport projects**. Grounded the work in research into passenger flow and ground-staff pain points, collaborated across airport operations, client stakeholders, vendors, and internal design teams to build the advertising and wayfinding strategy. The result was designed to **complement the passenger journey rather than disrupt it**, reducing visual confusion and perceived dwell time. Managed a team of five through the full lifecycle of each project, and **pitched concepts that converted into new client engagements**.

Experience Designer / Freelance / Nov 2018 – Jun 2022

Designed physical and digital brand experiences, spatial layouts, and customer engagement strategies for clients across finance, OTT, FMCG, and fashion.

CURRENT PROJECT

Co-Founder / Colour for Care / June 2025 – Present

Building and piloting a social initiative to improve neglected community environments through participatory art and human-centred design. Delivered three on-ground projects in West Bengal, translating community needs into structured, implementable spatial interventions while developing the initiative's impact model and go-to-market approach. Managed community engagement, opportunity identification, intervention design, stakeholder partnerships, and project delivery.
